

Capacity Building

CAREC Institute provides innovative and targeted knowledge support in the form of capacity building and training activities to build, strengthen, and develop member countries' expertise in areas of regional cooperation.

BROADENING OF ACTIVITIES

- Hybrid format of capacity building activities.

- Study tours and peer learning program.
- Online self-learning programs.

- Training of trainers and community of practice.
- Policy dialogues.
- Member countries best practices knowledge sharing.

- Cascading and blended learning programs.
- E-Learning platform and virtual trainings.
- Research-based capacity building interventions.
- Hybrid learning program.

- Face-to-face workshops.

THREE-PHASED CASCADING & FULL CYCLE

Based on a hybrid approach, the CAREC Institute delivers blended workshops to target participants in a three-phased cascading capacity building cycle.

PHASE I

is the generation of research-based digital learning materials (DLMs) virtually – recordings of expert presentations and discussions that are customized and uploaded on the CAREC Institute E-Learning Platform.

PHASE II

is virtual or face-to-face capacity building engagements after materialization of 1st phase generated DLMs and other educational materials. Also, in this phase further generation of learning materials takes place through livestreaming of virtual/physical events and their recordings will be customized, uploaded and ran on the E-Learning platform. At the end of this phase, assessment for potential training of trainers (ToT) will be made and follow up actions planned.

PHASE III

is organization and running of all generated learning materials in each priority area and continuous virtual engagements with target participants and all stakeholders for further capacity building and knowledge sharing through the CAREC Institute E-Learning Platform. Also, follow up experiential learning tours mainly to graduates of ToT programs will be organized.

Capacity Building

INTEGRATED APPROACH

CAREC Chai

In many countries and cultures throughout CAREC region, people have the most frank and open conversations in their kitchens over a cup of tea – widely known as the "Chai" talks. In light of that, CAREC Chai Series aim to facilitate open discussions among experts, think tanks, development partners, and CAREC government representatives, to exchange views and share opinions on the ongoing hotspots and prospects of connectivity and cooperation in CAREC region.

Policy dialogues

Since 2020, the CAREC Institute has diversified knowledge services to acquire the agility and flexibility in addressing the increasing needs of member countries. Policy dialogues have been the main instrument to design and deliver timely policy discussions in digital CAREC, climate change, water management, etc.

Cascading and blended learning programs

Since June 2020, the CAREC Institute has transformed its knowledge services to cascading and blended learning. The Institute started with transport-related activities and has gone to cover all five CAREC priority clusters.

Research-based capacity building interventions

The CAREC Institute, using its in-house professional and analytical capacity, conducts high-quality, research-based capacity building activities to develop the sustainable capabilities and skills of partner organizations.

Training of trainers and community of practice

The CAREC Institute conducted the CAREC Road Asset Management Maturity Assessment in 2021 and a series of country specific workshops in 2022–2023, and the Knowledge Sharing Series: Chinese Best Practice in Cross-border E-commerce in 2022.
