# The powerful Al in fashion industry 服装垂直产业链中的人工智能应用

By Alibaba Rhino Intelligence Manufacturing, CTO 犀牛智造CTO 杨晓刚

# The world's 1st lighthouse factory in the fashion industry

使命 Mission

让时尚应需而造

愿景 Vision

成为全球最大的数字化柔性制造的基础设施, 让商家像使用云计算一样使用云端制造

Provide the world's largest digitized, flexible manufacturing infrastructure for businesses, making "made-in-cloud" solutions as easy to leverage as cloud computing.

沙特阿美/天然气处理(沙特阿拉伯) 上汽大通/汽车(中国)

汉高/消费品(德国)

### Our Case: intelligent fabric/materials inspection machine

### features

- Reliable self-developed technology,
- flexible deployment Accurate detection rate (actual detection rate 90%)
- Supports continuous operation for 24 hours, improving work efficiency
- Digitalized and standardized quality results traceable

### features

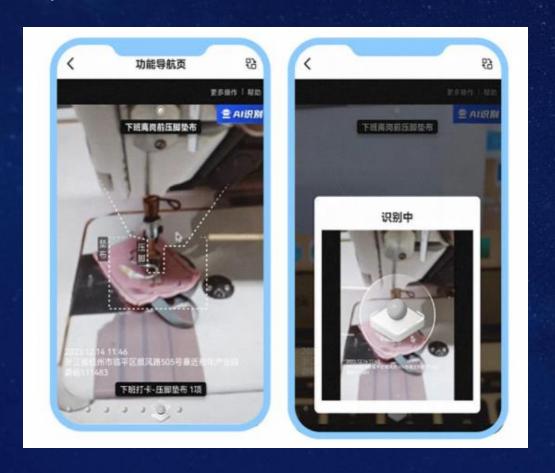

Motion vision and OCR technology applications can be used in the Al quality inspection field of apparel raw materials.

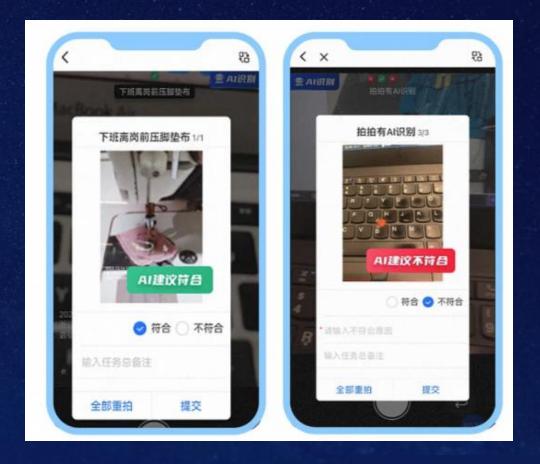

### Our Case: 5S practice copilot for lean manufacturing

- Utilizing AI to perform video analysis on 5S execution result images,
- forming a digitized PDCA quality management loop, assisting managers in identifying improvement points.

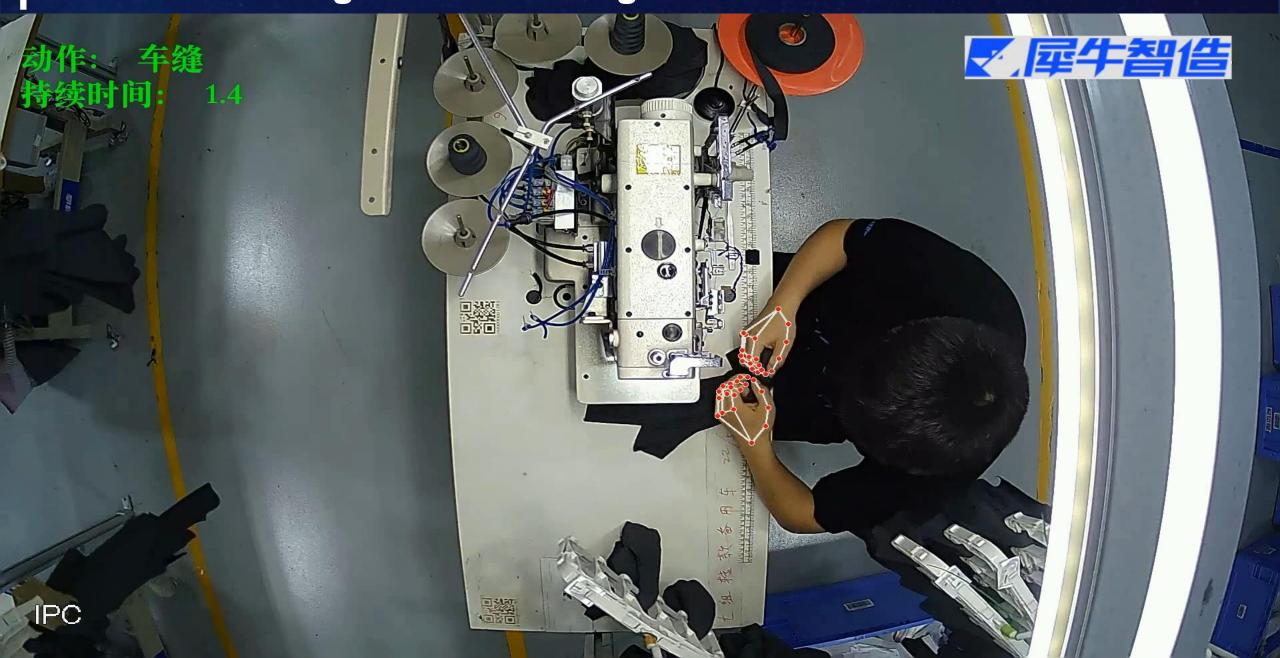

best practice: putting presser foot cloth

audit whether employees have completed their work by Al

### Our Case: recognition of sewing actions

## Our Case: recognition of quality inspection actions

# Thanks
