

**CUSTOMS SERVICE
UNDER THE GOVERNMENT OF THE REPUBLIC OF TAJIKISTAN**

**23rd Meeting of the Customs Cooperation
Committee Central Asian Regional
Economic Cooperation (CAREC)**

15-16 August 2024, Astana, Kazakhstan

THE CUSTOMS BORDER OF THE REPUBLIC OF TAJIKISTAN

Area: 143.1 thousand square km;

ORGANIZATIONAL STRUCTURE OF THE CUSTOMS SERVICE UNDER THE GOVERNMENT OF THE REPUBLIC OF TAJIKISTAN

-  35 customs border crossing points
-  22 road customs checkpoints
-  5 international border crossing points at airports
-  4 international railway and 1 river checkpoints
-  3 pedestrian checkpoints

THE HISTORY OF ESTABLISHING DIGITAL CUSTOMS IN THE REPUBLIC OF TAJIKISTAN

❖ The Customs Service began its long journey of digitalization and automation of its processes and the introduction of new technologies in 2005.

❖ In 2005, before the introduction of information technology in the customs authorities of the Republic of Tajikistan, most operations and activities in various areas were traditionally carried out manually and were paper-based.

INTERNATIONAL COOPERATION

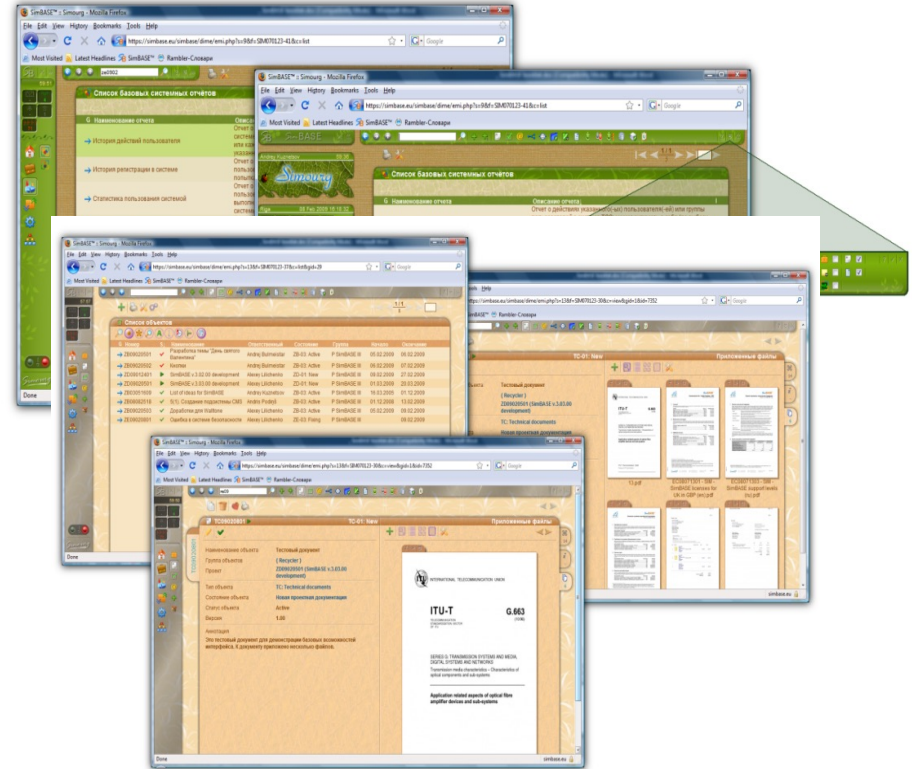

TWO INFORMATION SYSTEMS ARE USED TO CARRY OUT CUSTOMS PROCEDURES

- ❖ UNIFIED AUTOMATED INFORMATION SYSTEM (UAIS)
- ❖ THE SYSTEM “SINGLE WINDOW TO CARRY OUT EXPORT, IMPORT AND TRANSIT CLEARANCE PROCEDURES”

UAIS OF THE CUSTOMS SERVICE

This system is a reliable, secure data transmission network, and includes the establishment of a unified infrastructure among regional structural divisions of the Customs Service and its Central Office providing access for users to central resources, including the database and the software.

UNI-PASS RISK MANAGEMENT SUBSYSTEM

❖ Scope of application:

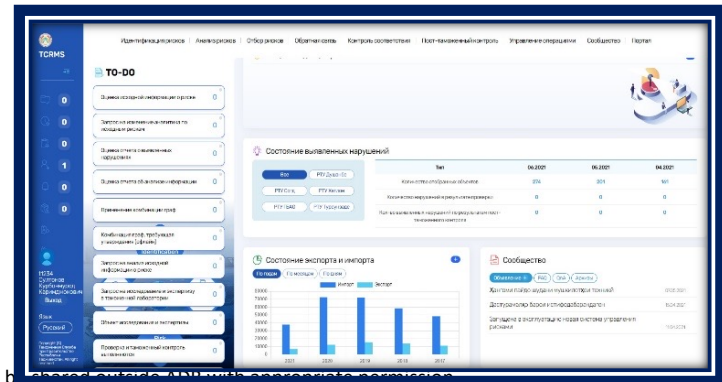

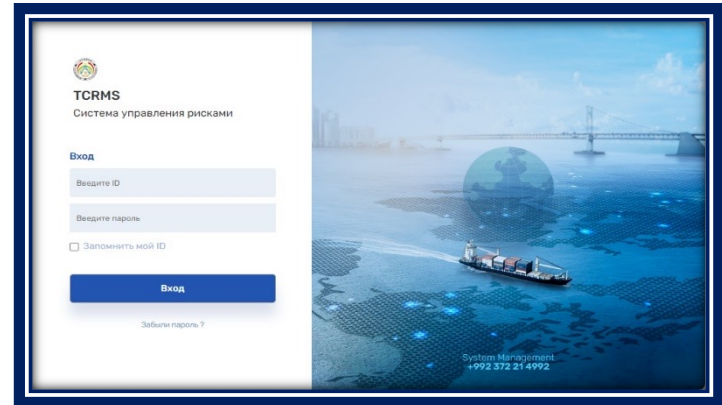

- 1) Customs clearance and control
- 2) Post-clearance customs control

❖ Functional structure:

- 1) Operational risk management
- 2) Tactical risk management
- 3) Strategic risk management
- 4) Risk assessment server

❖ Processes under automation:

- 1) Risk profile management
- 2) Risk assessment and control during customs clearance
- 3) Post-clearance customs control

INTERNATIONAL ROAD TRANSPORT (TIR)

The TIR Carnet system was adopted within the framework of the Cooperation Agreement among the Customs Service under the Government of the Republic of Tajikistan, the Association of International Road Freight Carriers of Tajikistan (ABBAT) and the International Road Union (IRU), with the attraction of investments from the Central Asia Trade Facilitation Program.

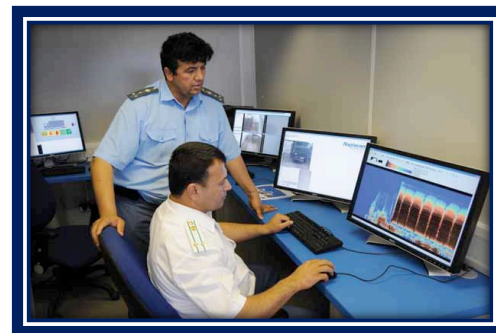

EQUIPMENT FOR CUSTOMS CONTROL

In January of the current year, the Government of the People's Republic of China provided customs control equipment to the Customs Service under the Government of the Republic of Tajikistan. This equipment was installed at customs border-crossing points and put into operation. Technical personnel at customs BCPs were trained to operate the specified equipment.

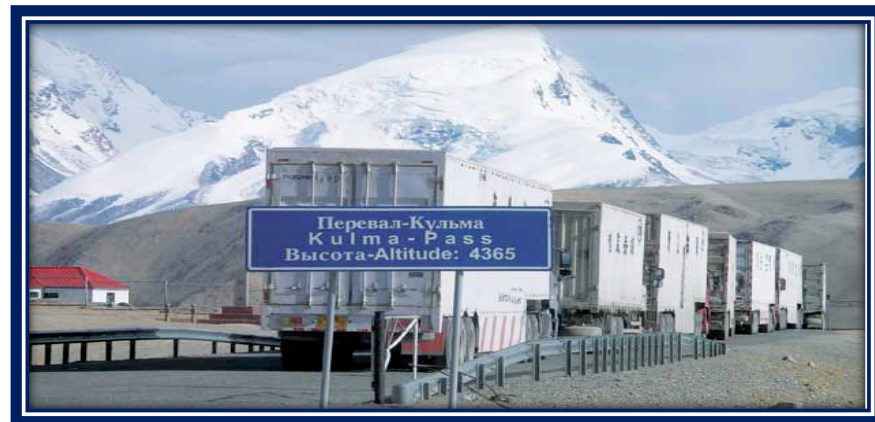

CONTROL OF VEHICLES

To control the import/export of vehicles through customs BCPs, CCTV cameras and cameras for reading license plates in real time have been installed. Control is carried out from the Central Office of the Customs Service and the records are stored in a special server.

THE SYSTEM OF E-PAYMENTS

Электронные платежи

To introduce electronic payments, within the framework of the Cooperation Agreement between the Customs Service under the Government of the Republic of Tajikistan and the Ministry of Finance of the Republic of Tajikistan, real-time data exchange on each payment transaction has been organized as envisaged for the payment of customs duties and fees , as well as their confirmation, using the non-cash system.

PROSPECTS FOR DEVELOPMENT OF THE CUSTOMS SERVICE

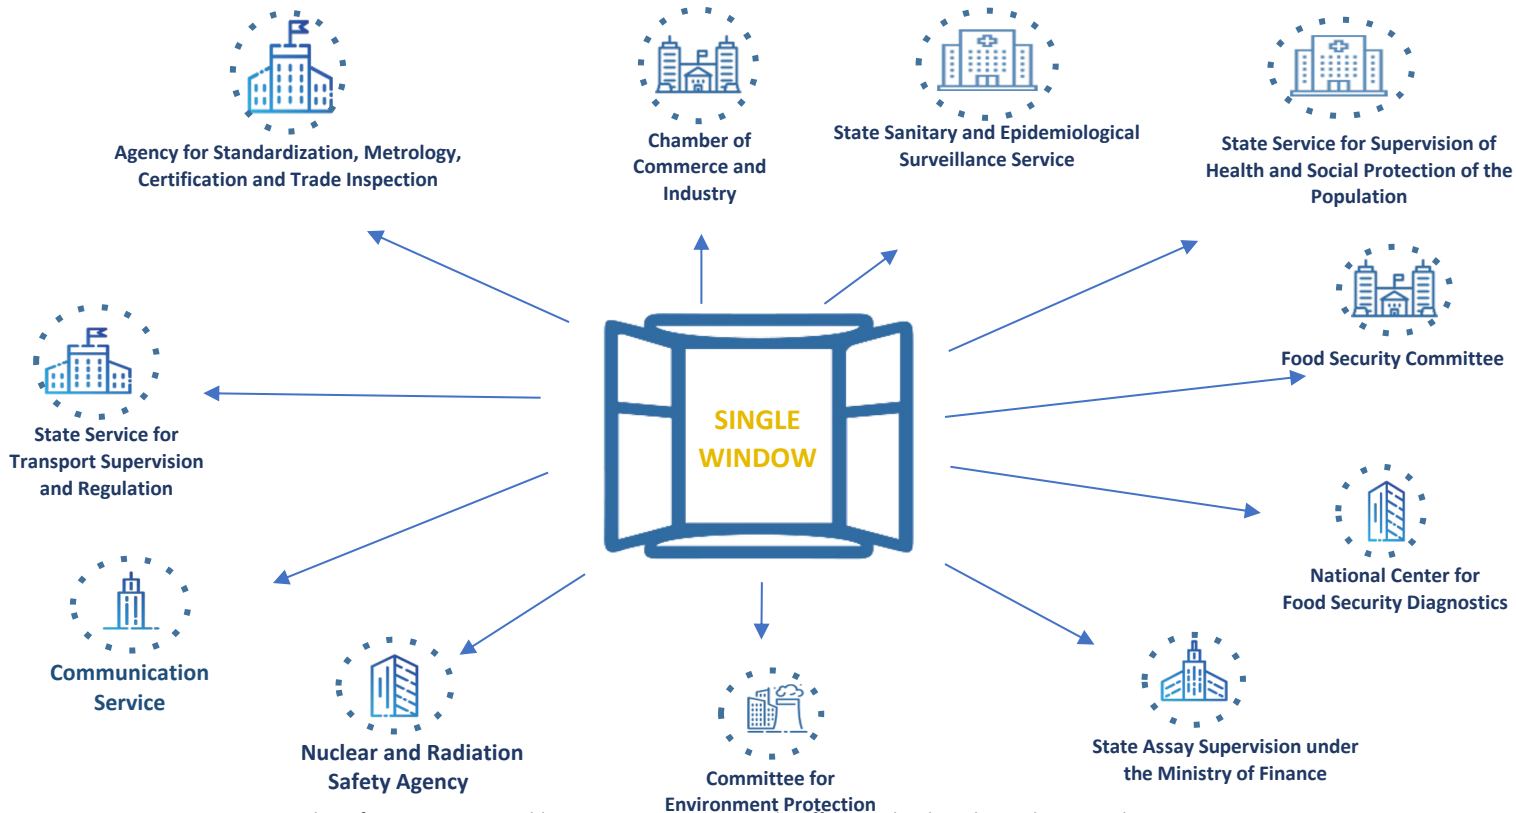

As part of multilateral cooperation with the World Bank and the United Nations Conference on Trade and Development (UNCTAD), with financial support from the World Bank, the ASICUDA system is planned to be adopted. This system was designed by the UNCTAD and is used in more than 90 countries around the world, thus contributing to comprehensive customs control and transparency of customs procedures in foreign trade.

This system enables to introduce digital customs operations, transparency of services, including the digitalization of customs payments using non-cash electronic payment systems, remote control of customs BCPs, pre-arrival information, etc., which is the basis for digitalization of customs agencies.

THE SYSTEM “SINGLE WINDOW FOR EXPORT, IMPORT AND TRANSIT CLEARANCE PROCEDURES”

INTERNAL. This information is accessible to ADB Management and staff. It may be shared outside ADB with appropriate permission.

Participants of the Single Window System

Traders

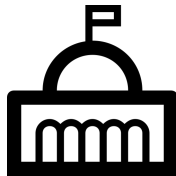

Brokers

Individuals

Departments

Laboratories

Customs

THE OPERATION PRINCIPLE OF THE “SINGLE WINDOW” SYSTEM

- 63 points to review applications from traders and issue permits are connected to the system throughout the country.
- The system allows traders to submit all import, export and transit information required by regulatory authorities in a single form only once and receive 22 permits electronically through the same channel.
- It automatically considers a permit document to be issued if the deadline for consideration of the subject’s application exceed the time limits as established by law.

THE OPERATION PRINCIPLE OF THE “SINGLE WINDOW” SYSTEM

- Automatic identification of users through the Tax Committee's system
- Automatic conversion of foreign currency to the national currency
- Providing a capability to pay for services of government agencies using an electronic wallet
- Eliminating the participation of a business entity in the process of submitting an application and obtaining a permit when performing export-import clearance procedures.
